

Deleting a Dashboard

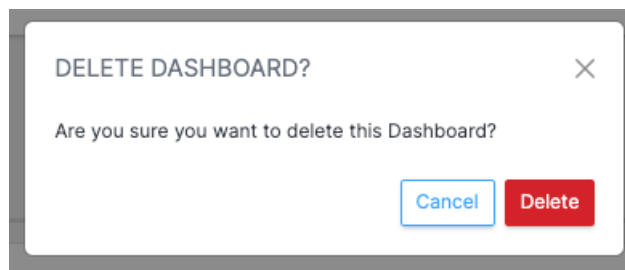

04/02/2025 10:44 am EDT

If a dashboard is deleted, it is deleted for all users and cannot be recovered. Please ensure no one is using the dashboard before you delete it.

To delete a dashboard, click on the *Settings* button to the right of the dashboard's name.

On the *Basic Settings* tab, click the *Delete* button. You see this modal.

If you click the *Delete* button, the dashboard is gone forever.
