

# Cloning a deep profile report

02/01/2024 8:48 am EST

To clone a deep profile report, open the report and go to *Settings > Definition*. Scroll to the bottom and select the *Clone* button.

On the next screen, you can rename the report and make any other desired changes.

## DEFINITION

### DeepProfile Name

Manual Example (clone)

### Baseline Label

Label

### Network <sup>?</sup>

CivicScience

### Filter by Segment

Canonical - U.S. Adults 18-34

### Filter by Target

No Target Filter Set. Search...
