Accounts/organizations

11/05/2025 6:56 am EST

Your organization will be set up as an account by your account manager. If your organization has subsidiaries, they will be set up as child accounts. For instance, if Major Media owned multiple television stations or publications, it would be set up as the primary account. A child account would be created for every property.

If you have access to multiple accounts, you may need to switch between them.
