# Searching for a Question

11/13/2023 11:59 am EST

There are thousands of questions in the InsightStore library. You can find them using any search terms, sort options, and filters.
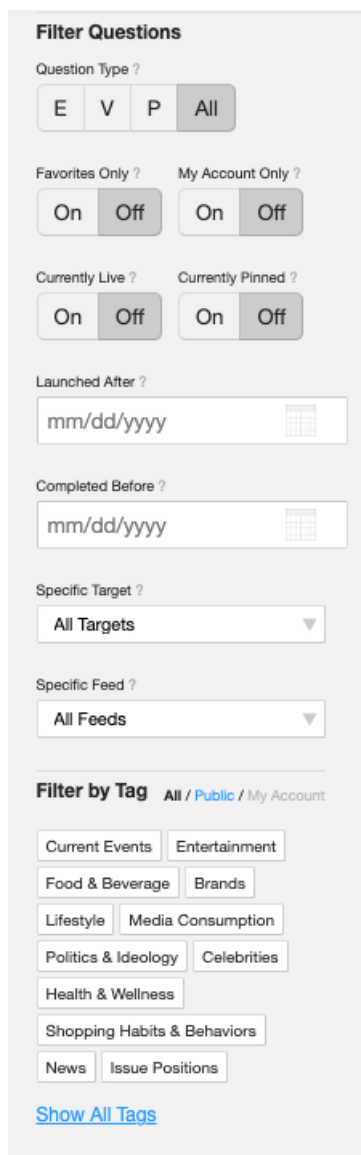

To quickly find the questions you are most interested in, choose your search terms, sort the list, and then use the many available filters.

You can combine search terms using the Boolean options *AND* and *OR*.

You're able to sort by *Newest First*, *Oldest First*, and *Most Responses First*.

Let's go over the filters.

First, there is *Question Type*: *Engagement* Questions, *Value* Questions, *Profile* Questions, or *All*.

Then there are *Favorites Only*, *My Account Only*, *Currently Live*, and *Currently Pinned*.

You may search for questions *Launched After* a particular date or *Completed Before* a specified date.

Finally, you can filter the questions list by *Target*, *Feed*, or *Tag*.

This video further explains the search process quite well.
