

# Responses shown in the poll unit admin tool

02/23/2024 1:24 pm EST

If you are logged in to InsightStore 1, responses for the question currently displayed on your site can be viewed in the poll unit admin tool. Click on the gear in the lower right corner of the poll, then go to the *Current Question* tab. Response totals are also displayed to the respondent after a set of questions is answered.

□

First, the response figures shown here are not real-time. There is some caching that occurs.

The responses shown in the poll unit admin tool come only from your audience. If you want to see the responses for all the sites that are showing this question, view the question in IS2 and use the *Network* filter to select the CivicScience Network. (The *View in the InsightStore* link in the poll unit admin tool goes to IS1, which doesn't have a network filter.)
