

# WordPress IQPoll plugin

07/14/2025 9:03 am EDT

The IQPoll WordPress plugin, currently in beta, is a module publishers can add to their site(s), enabling them to install the IQPoll widget without technical knowledge or code access.

Once installed and activated, the plugin enables the media partner to place the IQPoll anywhere on a WordPress website using a shortcode. You can insert the shortcode [IQPoll] in any editable region of the website.

  - [Troubleshooting IQPoll-Wordfence conflicts](#)
- [IQPoll plugin removal](#)

Note: The plugin may only be used for one instance of the poll unit. If the site requires multiple instances (such as one poll in-article and another in the sidebar), please use one of the other methods of placing the poll unit into your WordPress site .
